

isport #

AccessMat® is a lightweight and durable 100% polyester roll out matting system specifically developed to create a permanent or temporary route for individuals of all abilities (pedestrians and wheelchair users).

AccessMat® is quick to install and remove. It enables you to easily create a safe and comfortable pathway, visible to all.

Available in different widths and lengths that are connectable, AccessMat® enables safe traffic on sand, snow and grass.

The mat is maintenance free and does not retain sand in its structure by the end of the season.

Environment friendly and Recyclable

This environmentally friendly product is easily installed and removed to accommodate any environmental regulations, which may pertain to your beach area. AccessMat® will channel the traffic and protect sensitive beach dunes from high traffic of individuals of all abilities (pedestrians and wheelchair access), as well as strollers.

AccessMat® is able to be cut and formed around existing beach structures. The UV stabilized polyester material is recyclable after use, reducing its environmental impact. It is also recyclable, reducing its environmental impact.

Specifically designed for pedestrian and wheelchair traffic, AccessMat® has a flat structure making it very comfortable for bare feet pedestrians and wheelchair mobility.

Comfortable and Safe!

AccessMat® provides the safest edges, which do not require secondary finishing. This highly reduces the risk of injury to bare feet or cutting your hands when installing or removing AccessMat®.

Furthermore, because our mat is manufactured with non-woven polyester material, it will not exhibit the wear and tear our competitors quickly show.

Its cool surface lends to the barefoot users' comfort, especially on those hot, sunny days!

ACCESSMAT® IS SIMPLY THE WORLD'S MOST COMFORTABLE ACCESS MAT.

Aesthetically pleasing

AccessMat® is available in both brown and blue. Visually attractive, the blue color of AccessMat® provides a highly visible surface, delineating the route particularly for people with visual impairments.

It is also offered in a brown color, which blends effortlessly into the landscape.

Affordable

AccessMat® offers the best quality / price ratio, satisfying our customers and exceeding their expectations. When compared to frequent replacement and extensive installation, maintenance or repair of our competitors, AccessMat® is the most economical solution on the market.

Developed, designed and manufactured by Sebastian Rogon, AccessMat® provides the most affordable way to create your beach access route.

Durable and Lightweight

Its durability and portability make it the perfect solution for providing pathways. It is simply the most durable access mat in the world.

The mat is created with a state of the art cross polyester reinforcement system, which ensures that proper rigidity and strength are preserved over soft terrains. Furthermore, because our mat is manufactured with non-woven polyester material, it will not exhibit the wear and tear our competitors quickly show.

AccessMat® can easily be carried by 1-2 people. At the end of the season simply roll up the mat and store it with our straps it until the next beach season.

Multiple of applications

AccessMat® can be used on the following terrains:

Sand

Grass

Snow

Gravel

At the following outdoor locations:

Beach / Lake

Ski stations

Forest

Playground area

Outdoor events

Installation and Maintenance

AccessMat® comes as a roll out matting system for a rapid and easy installation. Very lightweight, you just need to unroll your mat and anchor it down using our spikes. Several mats can easily be connected to accommodate the length of your desired pathway, thanks to its innovative, seamless and invisible to the eyes connection system. Unlike some of our competitors' products, your mat will remain as light as upon initial installation, as sand does not accumulate within the flat polyester surface. Two people can effortlessly install a section of 30 meters in less than 10 minutes.

Minimal maintenance – It can be easily cleaned by use of a broom, blower, or pressure washer – sand goes through the permeable structure of the mat and does not get stuck under the surface of the mat.

Paints clés :

- AFFORDABLE
